

Job Title	RiskAnalyst
Company	Advantage Insurance Company Ltd (AICL)
Reporting to	Chief Risk Officer/Senior Risk & Compliance Manager
Location	Gibraltar
Full/Part Time	Full Time (Mon-Fri)

Role Purpose

- To be part of a small team delivering risk management & compliance assurance to the Board, management, risk owners and Hastings Group.
- To undertake risk management & compliance assurance activities delivering timely compliance with the GFSC financial & regulatory reporting and an effective regulatory relationship.
- To be the InfoSec initial escalation point for the local outsourced IT service provider.

Accountabilities:

- To undertake/advise the identifying, assessing, managing, monitoring and reporting of Company Risks contribute to the risk review process.
- To undertake activities and provide timely assurance as part of regulatory risk reporting, notably for the Own Risk & Solvency Assessment and Solvency & Financial Condition report.
- In conjunction with Risk and Control Owners, ensure AICL risks and controls are managed effectively including ensuring the completeness, accuracy and appropriateness of SII data.
- To maintain risk documentation including risk appetite statements, policies & risk registers.
- To promote an effective Risk & Compliance culture & practices including embedding appropriate policies as well as carrying out other ad-hoc related work.
- To be the initial escalation point for Business Support and the local outsourced IT service provider providing them with guidance and direction as required to supporting timely resolution of technology issues for AICL colleagues including project managing local IT & cyber risk initiatives.

Skills Knowledge & Experience

Essential

- Self-motivated, team-orientated with strong time management and priority setting skills.
- Well organised and methodical, able to plan work to achieve challenging delivery timescales.
- Good written and verbal communication skills, including confident delivery.
- Able to explain complex issues in a straightforward way.
- Analytical and numerate, with the ability to interpret technical information & financial data.

Qualifications

- Experience of working in an office environment desirable.
- Preferably educated to degree level, but at least A level.
- Willing to study for or part way towards a relevant accounting/professional qualification.

The exact role can be tailored for someone with current risk management experience or an individual looking to develop a career in risk management including information security.
